

Electrical System Protection and Discrimination Studies Training Course – Eta-19

COURSE OBJECTIVES

This course is designed for Authorised Persons (HVAP's and LVAP's) and design engineers who are responsible for the design and commissioning of complex High Voltage (HV) and Low Voltage (LV) distribution systems.

It is particularly suited for engineers who wish to develop their engineering skills in this specialist area.

COURSE CONTENT

- Network Design Principles.
- Fault level calculation.
- Protection and Inter-tripping systems.
- Direct Current (DC) Systems for Tripping/Closing.
- Fuse protection systems.
- MCB/MCCB Protection systems.

BENEFITS OF THE COURSE

The course will provide delegates with the necessary skills to apply:

- Protection and discrimination studies.
- Selection of protective devices.

WHAT DO I NEED TO BRING TO THE COURSE?

Nothing as a comprehensive set of hand outs will be issued during the course.

DURATION OF THE COURSE

This is a four day course designed to be delivered on site with a maximum of eight delegates.
